

## ZOHO Recruit

### Publish job openings

Give your job openings the reach they deserve and publish them to most popular job boards.

### Build your careers webpage

Use the power of your brand and create a careers website that seamlessly blends with your site.

### Social sourcing and engagement

Integrate your company's Facebook and Twitter accounts to engage directly with candidates.

### Pre screen candidates

Use custom questionnaires to screen applicants at the beginning of your hiring pipeline.

### Import and parse resumes

Extract resumes from email attachments, company websites, job boards, and spreadsheets.

### Customize your hiring

Make Zoho Recruit work your way with custom modules to create new functionalities.

### Territory management

Split up your workload amongst your recruiters based on geography and other criteria. Multiple locations, one database.

### Make calls and send messages

Update your candidates with Zoho Phonebridge or send text messages from within Recruit.

### Automate business processes

Automate daily tasks and create workflows to perform actions when field values are updated.

### Start onboarding as soon as you hire

With the Zoho People integration convert a hire into an employee within Recruit's database.

### Advanced insights and analytics

Access over 50 pre-determined reports for your hiring modules to track growth and progress.

### Integrations for convenience

Several Zoho apps as well as G Suite, Outlook, Zapier and many other third-party applications.

### Mobile app

Hire candidates even while you're away from your desk with our iOS and Android mobile apps.
